

VEGA PLUS

The biggest and toughest cleaning tasks are no longer a problem with this flagship model in the Steam Australia Range.

High temperature low pressure steam simply dissolves dirt away. Surfaces are cleaned and sanitised with the minimum use of chemicals or detergents saving time and money while safeguarding the environment.

The machine's cleaning system will ensure that your own HACCP regulations are not only maintained, but exceeded, on your premises.

Utilising dry steam heated over 100°C, germs, grease and grime will be easily and quickly removed. The integral heavy duty wet/dry vacuum will clean up the residue while you steam, resulting in an instantly touch-dry surface ready for use.

A chemical injection facility enables the addition of a suitable mild detergent to the dry steam jet.

Technical Spec:	Electrical Supply: 230V 50/60 Hz Current: 2200 watts 10amp Also available as 15 amp Water Tank: 5L Chemical Tank: 5L Stainless Steel Boiler: 3 litres Steam Pressure: 8 bar Steam Temperature: 180°C Heating up Time: approximately 9 minutes 1200W Wet/Dry Vacuum Operating Time: Continuous Assembled Size (L x W x H): 74 x 36 x 107 cm Weight: approximately 35 kg Cable Length: 4m Housing Cover: Stainless steel Steam Adjuster: variable Electric Cables: Silicon covered, flame proof Safety Thermostat: Temperature limit 195°C Components: 2/3 nylon, 1/3 fibreglass tested to 260°C Electrical Switches: Water spray proofed
